Hi Sandy:

I hope his note finds you well! I will be attending the meeting tonight, however I want to send this to you and ask you if you could be so kind as to forward this to the rest of the board please. Thank you!

I have been at Terra Rustica many times in the past few weeks, the light in question that the neighbors were complaining about, does not project towards their property in any way. The light projects totally down towards the stairs. The many times that I have been there, the music is inside the restaurant no outside. I want to share my observations with the board so we can make an equitable and fair decision towards this case. I think the complains are unfounded and bias.

Be well see you guys later!

Best Regards,

*Jesus*
