## Full Environmental Assessment Form Part 1 - Project and Setting

## rstructions for Completing Part 1

Part 1 is to be completed by the applicant or project sponsor. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification.

Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either "Yes" or "No". If the answer to the initial question is "Yes", complete the sub-questions that follow. If the answer to the initial question is "No", proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the project sponsor to verify that the information contained in Part 1 is accurate and complete.

## A. Project and Sponsor Information.

Name of Action or Project:		·
Parth Knolls, LLC - Project		,
Project Location (describe, and attach a general location map): Survey att	ached in submission p	acket
87 Hawkes Avenue, Ossining, New York 10562		
Brief Description of Proposed Action (include purpose or need):		•
To obtain the approval from the Town of Ossining Pl property for fifty-three (53) multi-family resident buildings, including recreation facilities.	anning Board to devel ial apartments in two	op the

h. Will the proposed action generate or emit methane (including, but not limited to, sewage treatment plants, landfills, composting facilities)?	∐Yes⊠No
If Yes:	
i. Estimate methane generation in tons/year (metric):	•
i. Describe any methane capture, control or elimination measures included in project design (e.g., combustion to ge	enerate heat or
electricity, flaring):	oneimo near ()
i. Will the proposed action result in the release of air pollutants from open-air operations or processes, such as	☐Yes⊠ No
quarry or landfill operations?	
If Yes: Describe operations and nature of emissions (e.g., diesel exhaust, rock particulates/dust):	
	w
j. Will the proposed action result in a substantial increase in traffic above present levels or generate substantial	
new demand for transportation facilities or services?	☐Yes No
If Yes:	•
i When is the peak traffic expected (Check all that apply): Morning Evening Weekend	
Randomly between hours of to	
ii. For commercial activities only, projected number of semi-trailer truck trips/day:	
iii Parking spaces: Existing Proposed Net increase/decrease	
iv. Does the proposed action include any shared use parking?	Yes   No
v. If the proposed action includes any modification of existing roads, creation of new roads or change in existing a	access, describe:
vi. Are public/private transportation service(s) or facilities available within ½ mile of the proposed site?	∐Yes∐No
vii Will the proposed action include access to public transportation or accommodations for use of hybrid, electric or other alternative fueled vehicles?	□Yes□No
viii. Will the proposed action include plans for pedestrian or bicycle accommodations for connections to existing	
pedestrian or bicycle routes?	∐Yes∐No
	•
k. Will the proposed action (for commercial or industrial projects only) generate new or additional demand	☐Yes⊠No
for energy?	
if Yes:	
i. Estimate annual electricity demand during operation of the proposed action:	·
Anticipated company line of the interest of the control of the con	,
ii. Anticipated sources/suppliers of electricity for the project (e.g., on-site combustion, on-site renewable, via grid/lother):	ocal utility, or
outer).	
iii. Will the proposed action require a new, or an upgrade to, an existing substation?	
the man and proposed assess require a new, or an upgrade at, an existing substanton:	∐Yes∐No
l. Hours of operation. Answer all items which apply.	
i. During Construction:  ii. During Operations:	
Monday - Friday: 8:00 am to 6:00 pm     Monday - Friday:	
• Saturday: 8:00 am to 6:00 pm • Saturday:	
Sanday.	
Holidays: None during major holidays     Holidays:	

m. Will the proposed action produce noise that will exceed existing ambient noise levels during construction, operation, or both?	X Yes □No
If ves:	
i Provide details including sources, time of day and duration:	·
See hours during construction in 1. above.	
	•
ii. Will proposed action remove existing natural barriers that could act as a noise barrier or screen?	☐YesĒNo
Describe: See tree survey attached for trees located within the area of deve	lopment.
n Will the proposed action have outdoor lighting?	⊠Yes □No
If yes:	
i. Describe source(s), location(s), height of fixture(s), direction/aim, and proximity to nearest occupied structures:	
Energy saving lighting fixtures, as required for the operation of the re	sidential
project and as allowed per the Town of Ossining Building Code.  ii. Will proposed action remove existing natural barriers that could act as a light barrier or screen?	
Describe: Remove 1 of trees in the president development of screen?	☐YeskINo
Describe: Removal of trees in the project development area. See tree survey located in the area being developed.	or trees
o. Does the proposed action have the potential to produce odors for more than one hour per day?	□Yest No
If Yes, describe possible sources, potential frequency and duration of odor emissions, and proximity to nearest	
occupied structures:	
p. Will the proposed action include any bulk storage of petroleum (combined capacity of over 1,100 gallons)	□Yes <del> </del> No
or chemical products 185 gallons in above ground storage or any amount in underground storage?	
If Yes:	
i. Product(s) to be stored	
ii. Volume(s) per unit time (e.g., month, year)	
iii. Generally describe proposed storage facilities:	
	· · ·
q. Will the proposed action (commercial, industrial and recreational projects only) use pesticides (i.e., herbicides,	☐ Yes ☑No
insecticides) during construction or operation? N/A	
i Describe proposed treatment(s):	
L Describe proposed hearmends.	•
	h.h
ii. Will the proposed action use Integrated Pest Management Practices?	☐ Yes k No
r. Will the proposed action (commercial or industrial projects only) involve or require the management or disposal	☐ Yes ☐No
of solid waste (excluding hazardous materials)? N/A	□ res □140
HYes:	
i. Describe any solid waste(s) to be generated during construction or operation of the facility:	
Construction: tons per (unit of time)	
Operation: tons per (unit of time)	
Operation: tons per (unit of time)  ii Describe any proposals for on-site minimization, recycling or reuse of materials to avoid disposal as solid waste:

c. Is the project site presently used by members of the community for public recreation?	□Yes⊠No
î. If Yes: explain:	
d. Are there any facilities serving children, the elderly, people with disabilities (e.g., schools, hospitals, licensed day care centers, or group homes) within 1500 feet of the project site?	□Yes⊋No
_fYes,	
i Identify Facilities:	
	<u> </u>
e. Does the project site contain an existing dam?	☐Yes ▼No
If Yes:	
i Dimensions of the dam and impoundment.	<i>:</i> `
• Dam height feet	
Dam length:     Surface area:     acres	
Volume impounded: gallons OR acre-feet  ii. Dam's existing hazard classification:	
iii. Provide date and summarize results of last inspection:	
f. Has the project site ever been used as a municipal, commercial or industrial solid waste management facility,	F-1 1
or does the project site adjoin property which is now, or was at one time, used as a solid waste management facility.  If Yes:	□Yes☑No ity?
Left Has the facility been formally closed?	☐Yes☐ No
If yes, cite sources/documentation:	☐ 1 co☐ 140
ii. Describe the location of the project site relative to the boundaries of the solid waste management facility:	
the sound was indicated in the sound of the sound was indicated in the sound was indicated in the sound in th	
	•
iii. Describe any development constraints due to the prior solid waste activities:	
g. Have hazardous wastes been generated, treated and/or disposed of at the site, or does the project site adjoin	□Yes⊠No
property which is now or was at one time used to commercially treat, store and/or dispose of hazardous waste?  If Yes:	
i Describe waste(s) handled and waste management activities, including approximate time when activities occurre	eď:
	·
h. Potential contamination history. Has there been a reported spill at the proposed project site, or have any remedial actions been conducted at or adjacent to the proposed site?	⊠Yes□.No
If Yes:  i Is any portion of the site listed on the NYSDEC Spills Incidents database or Environmental Site	⊠Yes⊡No
Remediation database? Check all that apply: Heating fuel oil tank leak	
Yes - Spills Incidents database Provide DEC ID number(s): 1411273	
Yes - Environmental Site Remediation database Provide DEC ID number(s):	
<u> </u>	
ii. If site has been subject of RCRA corrective activities, describe control measures: N/A	
iii. Is the project within 2000 feet of any site in the NYSDEC Environmental Site Remediation database?  If yes, provide DEC ID number(s):	□YesEINo
iv. If yes to (i), (ii) or (iii) above, describe current status of site(s):	
	: 7 7
Fuel tank has been removed. Remediation work has been completed. Spi	<u> </u>
report in the process of being closed.	

v. Is the project site subject to an institutional control limiting property uses?	□Yes⊠No
If yes, DEC site ID number:	
Describe the type of institutional control (e.g., deed restriction or easement):	
Describe any use limitations:	
Describe any engineering controls:	
<ul> <li>Will the project affect the institutional or engineering controls in place?</li> <li>Explain:</li> </ul>	□Yes⊠No
	'.
2. Natural Resources On or Near Project Site  What is the average depth to bedrock on the project site? approximately 8'-0" feet	
Are there bedrock outcroppings on the project site? None that are visible at this time.	☐ Yes ☑No
Yes, what proportion of the site is comprised of bedrock outcroppings?	
Predominant soil type(s) present on project site:  % %	•
<u> </u>	•
What is the average depth to the water table on the project site? Average: _ +/- 8 feet
